Summary

Third-year Computer Science student who turns ideas into deployed products across web development, AI and cloud, with a careful eye for UI/UX design. Azure and Oracle Cloud certified, currently exploring application security and agentic AI. Seeking software engineering internships and entry-level roles.

Education

Bannari Amman Institute of Technology, Tamil Nadu 2024 – 2028
B.E. Computer Science and Engineering *CGPA: 7.09 (up to 4th semester)*

Vignesh International School, Tamil Nadu 2024
Higher Secondary (12th) *70.40%*

My First School International School, Tamil Nadu 2022
Secondary (10th) *85.04%*

Projects

UX Session Replay Analytics | *React, TypeScript, FastAPI, PostgreSQL, WebSockets, rrweb* Live Code

- Built a platform that records real user sessions, replays them and automatically flags rage clicks; led the backend in a team of three.
- Designed a sliding-window rage-click detector with four severity levels, covered by automated Vitest tests.
- Delivered live dashboards over WebSockets: click heatmap, severity alerts and replay with timeline markers.
- Deployed on Vercel, Render and Neon Postgres; fixed connection-pool and concurrent-insert race conditions.
- Patent application filed (2026); research paper in progress.

Jawabdehi: Government Accountability Platform | *React, Vite, Tailwind, Web Crypto, Vercel* Live Code

- HACKCACHE'26 national hackathon: **7th place**.
- Tamper-evident complaint record: SHA-256 hash chain with a verify check that pinpoints the changed entry.
- Escalation engine that moves a complaint up a chain of authorities when deadlines pass; role-based privacy views; AI-drafted reports where every field must quote the citizen, validated on the server.

StreetGuard: Parametric Income Insurance | *React, FastAPI, scikit-learn, Firebase, Razorpay* Live Code

- Guidewire DEVTrails 2026 (45 days, Team Code4ce): **Diamond tier, top 1%** of 2,000 teams.
- Platform that detects weather and air-quality disruptions for gig delivery workers and triggers a payout, using live OpenWeatherMap and WAQI data.
- scikit-learn models for premium pricing and fraud checks; OTP login and a simulated UPI payout flow (Razorpay test mode).

Meiyaa: Scam and Misinformation Detector | *Python, FastAPI, React, sentence-transformers* Code

- Detects scams in Tamil, Tanglish and English messages, gives a risk score, highlights suspicious phrases and explains the result in plain language. Built for OpenHack26.

Technical Skills

Languages:	Python, Java, C, JavaScript, TypeScript, SQL
Frontend:	React, Vite, Tailwind CSS, HTML, CSS, Framer Motion
Backend & Data:	FastAPI, REST APIs, WebSockets, PostgreSQL, Firebase Firestore
AI / ML:	scikit-learn, sentence-transformers, LLM APIs
Cloud & Tools:	Microsoft Azure, Google Cloud, Oracle Cloud, Vercel, Render, Git, GitHub, Vitest, Figma

Achievements

- Diamond tier (roughly top 1% of 2,000 teams), Guidewire DEVTrails 2026.
- 7th place, HACKCACHE'26 national hackathon.
- Patent application filed for the UX Session Replay Analytics system (2026).
- Cleared Level 1 and competed in Level 2 of TN Skills 2025, Cloud Computing.

Certifications

Microsoft Azure Fundamentals • OCI Foundations Associate • OCI AI Foundations Associate • Google AI Agents Intensive • Salesforce Agentforce (Agentic AI)
